NEW ADDITION
JANUARY 2026

Reading and Dictation Passages have been marked for 20 words each, so that the same can be dictated for 80 to 160 wpm speed.

Exercise 1

Sir, we notice all sorts of methods are being employed to weaken our country to disturb peace in our country. ²⁰ Efforts are being made to create a feeling among the tolerant and peaceful people of this country that may change ⁴⁰ the life-style here. We do not have to submit to separatist, we have to face them. We will face ⁶⁰ all of them with all our might who try to weaken our freedom, our security and our future through threats, ⁸⁰ pressurisation and causing infights. We will not allow them to rise. We will not stop till terrorism completely eliminated ¹⁰⁰ or till the terrorists do not return to the country's mainstream giving up their arms. We do not have to ¹²⁰ give up our courage, we do not have to be fearful. Gandhiji had said, Independence means fearlessness against death. A ¹⁴⁰ nation afraid of death cannot become free and if it attains freedom it cannot protect it. The words of Gandhiji ¹⁶⁰ should resound in our ears today and we must face this challenge boldly. We must remember that we will not ¹⁸⁰ counter them for taking revenge. If we try to take revenge then it will only serve the designs of the ²⁰⁰ terrorists. Revenge would only bring victory to terrorism. If we use restraint, terrorism will weaken and ultimately get defeated. We ²²⁰ must not fall in the trap of terrorism. Gandhiji had said that licence can have an answer to violence. Only ²⁴⁰ non violence can be an answer to violence.

India holds its head high in the world today. The voice of India ²⁶⁰ is heard in the world with respect. Why? How is it that a country which was a slave, poor till ²⁸⁰ fifty years ago, and about which people used to think that it would never stand on its own and could ³⁰⁰ not safeguard its freedom, now speaks out in such a strong voice. It has been possible, because we moved forward ³²⁰ taking with us the concepts of Gandhiji, principles of Panditji and the path shown by patriots. We have learnt to ³⁴⁰ speak fearlessly, we have learnt not to submit under pressures, we have learnt to move forward on the path of ³⁶⁰ non-violence with courage and facing the challenges boldly. We launched a movement against the atomic weapons in the world during ³⁸⁰ the last fifty years. Today many powerful countries are attracted towards it which is dangerous for the whole population of the universe. ⁴⁰⁰

TOLERANT: enduring; ELIMINATE: to end;
REVENGE: inflict punishment; LAUNCHED: started.

Handwritten shorthand notes corresponding to the text, written in a cursive style on lined paper.

Exercise 2

The feeling that Gandhiji and Panditji had brought to the fore before our Independence, is now spreading throughout the world ²⁰ after forty or fifty years. It is just insanity that we continue to manufacture weapons while the available weapons alone ⁴⁰ can extinguish the entire world 50 times. It is really madness that 15 to 20 million rupees are spent every ⁶⁰ minute in the world on arms race. Even a small fraction of it can help a lot in eradicating poverty, ⁸⁰ diseases and unemployment. Today, India is paying attention to these things. We are paying attention to human rights and human ¹⁰⁰ dignity. South Africa, where Gandhiji had started his first satyagraha, is still reeling under slavery. The flag of freedom has ¹²⁰ not still gone up there. It is shameful that 100 years have passed, hundreds and thousands of freedom fighters ¹⁴⁰ have offered sacrifices including their lives and the place from where the flame of freedom rose is still under slavery. ¹⁶⁰ We have raised the question of poor people in the world. We have taken up the cause of suppressed sections ¹⁸⁰ of the world. We have demonstrated that our voice is that of balance, tolerance, compassion, truth and non-violence. Last month ²⁰⁰ we signed an agreement in Sri Lanka, an agreement that proved the righteousness of our policy, which demonstrated that the ²²⁰ impact of our foreign policy is good and that India was moving on the right path. This is an important ²⁴⁰ achievement in these fifty years. The latest agreement that we have reached and signed has brought peace and cooperation in ²⁶⁰ Sri Lanka. This has strengthened the cause of peace and cooperation in the entire region. We have stalled the activities ²⁸⁰ of those people who were endangering the security of the entire region, otherwise the race of power blocs could have ³⁰⁰ reached this region - the neighbourhood of India. This has strengthened the cause of non-alignment. It has been proved that countries ³²⁰ can solve their problems through dialogue without allowing the big powers or other sections or parties to come in. We ³⁴⁰ have seen that when difficult. Today on the 50th anniversary of our Independence we have to ³⁶⁰ re-dedicate ourselves to those ideas and concepts.

Our greatest achievement is the system given to us ³⁸⁰ by our forefathers. We have seen that the system is in tune with our ancient traditions and our culture, which ⁴⁰⁰ is continuing uninterrupted for thousands of years. We used that spirit in our struggle for freedom and should use it ⁴²⁰ in building a new India. Today our greatest attainment is our democracy and we have to safeguard and consolidate it. ⁴⁴⁰

Handwritten shorthand notes in Devanagari script, corresponding to the typed text on the left. The notes are written in a cursive style, using various symbols and abbreviations to represent the words and phrases of the original text.

Exercise 3

Mr. Deputy Speaker, Sir, I am very glad that I have the opportunity to take part in the discussion on the ²⁰ Demands for Grants in respect of the Ministry of Labour. I am very happy, we have got a very good ⁴⁰ Labour Minister, but I do not know whether he is able to take all the steps necessary to improve the ⁶⁰ labour situation in this country at this critical moment. The Industrial Policy Resolution of 1956 clearly mentions that ⁸⁰ in the process of rapid industrial development, labour assumes a vital role to establish a socialistic pattern of society. ¹⁰⁰ The main problems facing the working class are of getting adequate wages, essential commodities at prices they can afford, some ¹²⁰ sort of shelter and cloth. The Government minimum needs programme has hardly reached the working class. The vast majority of ¹⁴⁰ labourers are unable to make both ends meet. The Government has mentioned endlessly on the question of evolving a national ¹⁶⁰ wage policy or an integrated wages incomes prices policy.

In the Labour Ministers' Conference, some time back, it was suggested ¹⁸⁰ that steps should be taken to enforce the minimum wages in the different industries. It was also suggested that non-implementation ²⁰⁰ of minimum wages should be declared as a cognizable offence and the offenders should be arrested. However, it had been ²²⁰ agreed at the Conference that more deterrent punishment should be given to the offenders and that the Act should be ²⁴⁰ amended suitably. Necessary changes should have been made in the Central legislation by this time. The Industrial Disputes Act had ²⁶⁰ become outdated and it should be completely overhauled. It has been claimed that the Emergency has brought discipline among labourers ²⁸⁰ and the production has been increased. Yes, it is a fact but the labourers are forced to work and they ³⁰⁰ are forced not to take part in the trade union activities. The trade union rights have been completely taken away ³²⁰ from the labour. But, Sir, I want to impress upon the Minister that motivations for work should not be imposed ³⁴⁰ from outside but it should come from within. A contented labour force is an asset to the development of industries. ³⁶⁰ You have taken away the permitted bonus. Some time back, this Parliament passed an Act to fix the minimum bonus ³⁸⁰ at 8.33 per cent. But, the same Act was adversely amended by the same Parliament ⁴⁰⁰ sometime ago.

COGNIZABLE: punishable under criminal law; DETERRENT: preventive; AMENDED: altered; ADVERSELY: unfavourably.

Handwritten shorthand notes corresponding to the typed text on the left, written in a cursive shorthand style on lined paper.

Exercise 4

Bonus was accepted by this Government as a deferred wage, but the same Government, has reversed the ²⁰ conception of bonus and this Government says that bonus is a deferred wage but it is connected with production ⁴⁰ and productivity. But what about the owners of industries? Do you know, how much have they reduced the dearness ⁶⁰ allowance of the workers now-a-days? Not only that a number of companies have been held guilty for failure ⁸⁰ to deposit the provident fund money and also for mishandling the amount due to employees. Every year, nearly two lakh ¹⁰⁰ employees come under the purview of the scheme. The total number of employees covered by the scheme in the year ¹²⁰ 1995-96 was 61 lakh and it was 75 lakhs in the year 1996-97 ¹⁴⁰ whereas the average refunds amount to Rs.100-125 crores ¹⁶⁰ The gross contribution to the fund was expected to reach Rs.58 crores in 1995-96 ¹⁸⁰ from Rs.51 in 1996-97 whereas the refunds to the employers on an average is ²⁰⁰ Rs.10-12 crores. Naturally, such a situation calls for stringent regulation and control over the operation and administration of ²²⁰ funds.

If the administration of the Provident Fund Scheme at various levels has to be really advantageous to the ²⁴⁰ employees, there should naturally be regional offices which could directly deal with members of the fund who go in ²⁶⁰ for advances, loans, etc. The present situation has offered an opportunity for the Government to make necessary meaningful changes in ²⁸⁰ a number of legislative measures which seek to protect and regulate the rights and working conditions of industrial workers and ³⁰⁰ other employees. In fact, several clauses of the legislative measures have little relevance to the present day conditions. Regarding the ³²⁰ Apprenticeship Act, once our Prime Minister said in the State Labour Ministers Conference that the Apprenticeship Act had not been ³⁴⁰ implemented vigorously. It had not been given a trial. Utilisation of apprenticeship opportunity or filling such vacancies has not been ³⁶⁰ uniform in all the State. Creation of skilled manpower has lagged behind the limits of possibilities. So, the more ³⁸⁰ important point is, what is to be done even more important is that there is a new sense of urgency and a will to get things done. ⁴⁰⁰ With regard to this the basic problem relates neither to the number of apprentices nor to the value of their stipends. ⁴²⁰ We hope that the Govt. shall do its best to alleviate the feelings of labour and take steps for that. ⁴⁴⁰

Handwritten notes in Urdu script, likely a translation or commentary on the English text, covering the same topics: bonus, provident fund, dearness allowance, and apprenticeship.

Exercise 5

Sir, very few concerns in the country are selling shares to the ordinary clerks and other employees because they do ²⁰ not want these ordinary people to become shareholders, as they will have their say in the Annual General Meetings. They ⁴⁰ confine to those own shareholders who will vote for their own persons to become Managing Directors, Directors and Chairman, etc. ⁶⁰ This is how manipulation takes place. The Government expects to get Rs. 5 crores out of this measure. What are ⁸⁰ the other measures by which Government could possibly get more money? I ¹⁰⁰ would like to know from my Hon'ble friend who is now disturbing the Finance ¹²⁰ Minister, what is the position in the cashewnut industry? He may be ¹⁴⁰ able to tell us. The point is, he does not apply his mind and he goes on disturbing the Finance ¹⁶⁰ Minister. That is the whole difficulty. The cashewnut not even paying 12 per cent. They are paying ¹⁸⁰ 10 per cent or 6 per cent.

The question is, some of these companies have been converted into junks. This ²⁰⁰ is the case with all the industries whether it/the textile industry or jute industry. When they are converted ²²⁰ into junks, they get the Government to take them over. Government goes on ²⁴⁰ taking them over the sick textile mills. What about healthy mills? Why should they not be ²⁶⁰ taken over immediately? In this case, this particular attempt which the Finance Minister is making will be nothing. It will be ²⁸⁰ an eye wash. What are they going to get? They are going to get Rs. 5 crores. If they had ³⁰⁰ demonetised, it would have brought thousands of crores. I expected this time that in the Budget, they will at least ³²⁰ say something about declaration that if somebody declares black money could have within three months or six months, they will be taxed ³⁴⁰ as per the Income Tax Act, without any fine and that money could have come into the hands of the Government. ³⁶⁰ It was tried on by my Hon'ble friend, but the result was not much. Still that should have been attempted. ³⁸⁰ In this case, you are taking only Rs.5 crores from the companies while Rs.300 crores from salaried employees. ⁴⁰⁰

MANIPULATION: manouvre to favour one; DEMONETISED: reducing the value of money.

Exercise 6

Sir, unless the key industries are nationalised, our economy is not going to improve. When we requested that Hindustan Motors ²⁰ should be taken over, the then Minister said that it was a junk. They are manufacturing Ambassador cars which are good ⁴⁰ cars, though people say, everything in that car minus the horn makes noise. When there was a lock out in ⁶⁰ the Standard Motors in Madras, we could have taken over that company. Automobile industry should be taken over. Unless the ⁸⁰ key industries are nationalised, our economy is not going to improve. This inflation cannot be checked only by robbing the ¹⁰⁰ people on the one hand and limiting the dividend to 12 per cent. So far as take over is concerned, ¹²⁰ I do not know who is going to take over whom. The highest bidder will take over the country. Therefore, I ¹⁴⁰ would request the Hon'ble Finance Minister not to rely solely on this measure, because Rs. 5 crores would be nothing. ¹⁶⁰ The monopoly houses should be taken over. Otherwise, they will hold the country to ransom.

During the national misfortunes, like ¹⁸⁰ when lakhs of refugees came from other side in starvation conditions there people were minting money. At that time, these sharks ²⁰⁰ went to the borders and sold daily necessities at fabulous prices and minted money at the cost of starvation of ²²⁰ these people. They want to mint money and maintain their profits at the cost ²⁴⁰ of anything. I am opposing this Bill only because this will not serve the purpose. Only a very small number ²⁶⁰ of companies will be covered by this. Most of the monopoly companies will function in such a way that they ²⁸⁰ do not declare any dividend at all. What about the control of their expenses? By this measure you are going ³⁰⁰ to get only Rs. 5 crores whereas by freezing the emoluments and dearness allowance you are getting Rs. 300 crores. ³²⁰ I want the Finance Minister to let us know what more measures are likely to be taken to control these ³⁴⁰ big business and monopoly houses, to curb them and reduce or minimise their profits and take over them. Because, unless ³⁶⁰ the means of production are taken over by the State, nothing is going to happen in this country. Moreover, Government ³⁸⁰ should have a close check on these monopoly house owners that they do not hide the Government revenue and pay ⁴⁰⁰ honestly; that they maintain proper books of accounts etc., and declare it to the authorities. With these words, I support ⁴²⁰ the Motion of Disapproval moved by my Hon'ble friend and request the Hon'ble Minister to make a statement on it.

440

Handwritten shorthand notes corresponding to the text on the left, written in a cursive style.

Exercise 7

Honourable Members, While Sardar Patel with his extraordinary abilities had accomplished the challenging objective of geographic and political integration of²⁰ the nation, the task of economic integration remained incomplete. Our traders and entrepreneurs always faced difficulties in sale and purchase⁴⁰ of their goods and in complying with different tax regimes prevalent in different States. Now with the implementation of a⁶⁰ comprehensive tax reform like the GST, the concept of 'One Nation-One Tax-One Market' has been realised.⁸⁰ GST is proving instrumental in establishing an honest and transparent system of trade and commerce which is also¹⁰⁰ benefitting the country's youth. This system, while reducing the difficulties faced by traders, has enhanced their ease of doing business¹²⁰ across the country. I congratulate my compatriots for wholeheartedly embracing the new system in a short span of time in the¹⁴⁰ interest of a better future for the country, in spite of the initial bottlenecks. My Government is continuously improving¹⁶⁰ the GST regime keeping in view the suggestions being received from the business community.

The primary focus of¹⁸⁰ my Government has been to enable our youth to earn their livelihood with dignity, while also creating employment opportunities for others.²⁰⁰ In order to facilitate self-employment, my Government has introduced wide ranging reforms, which are being appreciated globally.²²⁰ As a result of these reforms, India's position has improved by 65 places in the Ease of Doing Business ranking,²⁴⁰ from 142 in 2014 to 77 now. This is an extraordinary achievement.

Honourable Members,²⁶⁰ During the last four and a half years, the economy of the country has been growing at a rate of²⁸⁰ 7.3 percent on an average. India is playing a significant role in international trade. While India's contribution to the³⁰⁰ world GDP was 2.6 percent in 2014, it has increased to 3.3 percent³²⁰ in 2017 as per the latest reports. India has emerged as the 6th largest economy in the world.³⁴⁰ This is an opportune moment for the country to play a decisive role in the 4th industrial revolution and³⁶⁰ my Government is committed to ensure that our citizens take full benefit of this opportunity. As a result of the³⁸⁰ 'Make in India' initiative effective outcomes in the field of industrial development and employment generation are clearly visible.⁴⁰⁰

COMPREHENSIVE: detailed;

TRANSPARENT: opennes;

OPPORTUNE: happening at right time.

Handwritten notes in Urdu script, likely a shorthand or summary of the text, covering the entire content of the exercise.

Exercise 8

Now India is the 2nd largest manufacturer of mobile phones in the world. Recently, the milestone of converting diesel locomotives into²⁰ 10 thousand horsepower electric engines has also been established by India. As a part of Make in India initiative,⁴⁰ Asia's largest MedTech Zone is being established in Andhra Pradesh. Defence Corridors are being established in Uttar Pradesh and Tamil Nadu,⁶⁰ which will not only strengthen our security through establishment of production facilities for defence equipment, but also provide employment to the⁸⁰ youth. Soon, the passengers will also be able to avail the ultra-modern facilities of our fastest train¹⁰⁰ 'Vande Bharat Express'. I also want to congratulate the scientists and engineers of our country who are tirelessly¹²⁰ working for recognition of India's prowess in this era of modern technology. The scientists and engineers from ISRO¹⁴⁰ in particular are proving their pre-eminent position in the world by setting new records in launching satellites. I, on behalf¹⁶⁰ of the nation, convey our best wishes to our scientists and engineers for 'Mission Gaganyaan'.

The focus of my Government¹⁸⁰ on timely completion of tasks, with accountability, has resulted in increasing the confidence of the people in Government functioning²⁰⁰ and has also enhanced the pace of development. My Government has established a reputation for time bound completion of projects.²²⁰ Many projects where delays in completion had become synonymous with injustice to common people of this country such as India's²⁴⁰ longest Bogibeel railroad bridge in Assam, Western Peripheral Expressway near Delhi, Kollam Bypass in Kerala have been fast tracked and²⁶⁰ completed. By completing these projects, my Government has done justice to the resources of the nation and aspirations of the people.²⁸⁰ Developing modern infrastructure for economic development as per the needs of 21st century, is the aspiration³⁰⁰ of every Indian, especially the middle class. Sensitive to their aspirations, my Government is completing new projects at a fast pace.³²⁰ The airport terminal constructed at Prayagraj in a record period of 11 months is an evident example. Last year,³⁴⁰ the country's first container vessel sailed along the national waterway from Kolkata and reached Varanasi. Eastern Peripheral Expressway, started in³⁶⁰ November 2015, has also been dedicated to the nation last year. My Government believes that eastern part of India³⁸⁰ comprising east Uttar Pradesh, Bihar, West Bengal, Odisha and the States of North-East, has the potential to become⁴⁰⁰ a new 'Growth Engine'. Therefore, my Government is relentlessly striving to strengthen the infrastructure related to railways, highways, waterways and airways in Eastern India.⁴²⁰ Under Udan Yojana, 19 new airports are being built in Eastern India and of these 5 are coming up in the North East.⁴⁴⁰

PROWESS: great skill at doing; SYNONYMOUS: similar

STRIVING: trying very hard.

Handwritten notes in Urdu script, likely a translation or commentary on the English text, covering the same paragraphs.

Exercise 9

Mr. Speaker, if agricultural production has to be maximised, the greatest attention has to be given to four factors. First, ²⁰ seeds should be of the right quality fertilisers and high yielding varieties of seeds. Then improved pesticides and water. As regards ⁴⁰ these four factors, it is interesting to see that Government or the Ministry does not appear to have paid any ⁶⁰ attention to certain malpractices that have crept into these matters. Take, for instance, seeds. There is no mention at all ⁸⁰ of the fact that a large percentages of these so called improved or high yielding varieties of seeds are adulterated. What ¹⁰⁰ steps has Government taken in this regard? Is it not of vital importance that seeds should be pure and unadulterated? ¹²⁰ Their effect on production is very great.

Therefore, from this point alone, all possible steps should be taken to prevent ¹⁴⁰ adulteration. The farmer suffers because he spends money on costly seeds in order that he may get the best possible ¹⁶⁰ yield, but finds that the seeds are adulterated. Why has not Government taken up this question in its own hands? ¹⁸⁰ Every State Government interferes in this matter. In fact, multiplication of seeds is done under the orders of the Agriculture ²⁰⁰ Department in State after State and yet when it comes to their quality control, adequate machinery does not exist. Then ²²⁰ you come to the question of fertilisers. Again these are of vital importance. What has happened? At one single stroke, ²⁴⁰ Government has doubled the prices of fertilisers and expects farmers to procure them in the required quantities knowing fully well ²⁶⁰ also that Government fixes the prices of what they produce at a level which makes it impossible for the farmers ²⁸⁰ to pay these high prices for fertilisers.

The previous speaker referred to the Agricultural Prices Commission. The Commission has fixed ³⁰⁰ the price, say, of wheat, at a certain level without taking into account the cost of production of the farmer. Yesterday, a ³²⁰ Member of the Advisory Committee to the Agricultural Prices Commission stated that he has sent his resignation because what ³⁴⁰ use it was to remain in the committee if no importance was ever attached to the advice tendered ³⁶⁰ on such a basic matter as cost of production? If cost of production is not taken into account, I would ³⁸⁰ like to state here that it is difficult to see on what basis the Agricultural Prices Commission fixed the prices. ⁴⁰⁰

YIELDING: earnings; ADULTERED: mixed with foreign matter.

Handwritten notes in shorthand script, likely representing the original text or a student's transcription. The notes are written on lined paper and cover the right side of the page.

Exercise 10

Several agricultural universities have carried out surveys and the results of these surveys are available. Punjab University carried out a ²⁰ survey and other research students have also and have pointed out what the cost of production would be. For instance, ⁴⁰ in regard to wheat they have arrived at the finding that the cost of production would be in the region ⁶⁰ of Rs.320. Yet the procurement price is fixed at Rs.305. What is the justification for this, ⁸⁰ in the face of the fact that the price of fertiliser, an important input, has been doubled? The prices have ¹⁰⁰ increased considerably and many types of pesticides that are in the market today are adulterated. What steps have the Government ¹²⁰ taken to ensure that the pesticides that in the market for sale to the farmers are of the right ¹⁴⁰ quality and are not adulterated ones? Is there any machinery? In regard to drugs at least in name, there is ¹⁶⁰ a drug controller in every State to see that the drugs sold are not adulterated. In regard to pesticides, ¹⁸⁰ have not you set up any machinery to ensure that the pesticides are not adulterated? Last but not the least important factor for ²⁰⁰ maximisation of agricultural production is water. They say they have programmes for increasing irrigation facilities.

During the Fourth Plan they ²²⁰ wanted to bring in a considerable additional area under irrigation so that they could have assured water supply. They have ²⁴⁰ similar programmes in the Fifth Plan. Why is it that a number of these projects are not completed within the ²⁶⁰ time schedule that is laid down? Why is it that a number of most desirable projects are not even taken ²⁸⁰ in hand for years for one reason or another and the majority of them are held up because of Inter-State ³⁰⁰ water disputes? What steps have been taken by the Government to resolve those disputes. They say that they have no ³²⁰ powers. What is the good of their saying so when the ruling party is today in a position to pass ³⁴⁰ any legislation that it desires, even to amend the Constitution as often as it likes? And yet it does not ³⁶⁰ take steps to settle these issues, which would result in self sufficiency in food grains and also in respect of ³⁸⁰ many vital cash crops needed for important industries. Why is it that we are unable to take any steps to ⁴⁰⁰ settle these disputes and allow them to continue with no end in sight? A little while ago, I think a ⁴²⁰ statement was placed on the Table of the House saying that there were 157 projects outstanding in the scheme. ⁴⁴⁰

PROCUREMENT: collection; PESTICIDES: pest killer;

Exercise 11

Honourable Members, Be it the country's fastest train, the highest bridge, the longest sea-link, the longest tunnel, construction of²⁰ highways at double the speed or gauge conversion of railway tracks, modern facelift of railway stations or metro projects in⁴⁰ cities, air connectivity among small towns or construction of new waterways, my Government is rapidly developing modern infrastructure in⁶⁰ all these areas. Keeping environment conservation in mind, my Government is moving forward on the electric mobility front. In order to⁸⁰ make the latest technology-based systems available in our cities so that they can become growth engines of the¹⁰⁰ economy, modern facilities are being developed in 100 cities under the Smart City Mission. The nation is moving at a¹²⁰ fast pace in the civil aviation sector also. This sector has seen a double digit growth during the last four years.¹⁴⁰ More than 12 crore and 30 lakh people travelled by air during 2017-18 and this number¹⁶⁰ is increasing constantly. This transformation, offers a glimpse of an India on the move. Under the 'Udan scheme',¹⁸⁰ 12 lakh seats have been made available to people at lower tariffs. This has provided the common person with²⁰⁰ an opportunity of air travel.

In addition, in the last four and a half years Government has established more than²²⁰ 300 new Passport Sewa Kendras in the country. Prior to 2014, there were²⁴⁰ 77 Passport Sewa Kendras, which have now increased to more than 400. People are no longer required to repeatedly visit big²⁶⁰ cities for getting their passports. In the all-round development of the country, a pivotal role is played by²⁸⁰ our labourer brothers and sisters, small and medium entrepreneurs, engineers, auditors, doctors, teachers, scientists and every professional. All these³⁰⁰ responsible citizens have lived up to this saying of Sant Ravidas that work is the best form of worship.³²⁰ That is, those who deem work as God, and worship it day and night, are blessed with all the worldly³⁴⁰ joys and contentment. Our hardworking professionals whether linked directly or indirectly with the Government, are watchful of³⁶⁰ the process of nation building. When their hopes and aspirations are combined with the willpower of Government employees, the result is³⁸⁰ unprecedented, as witnessed by the nation today. My Government is also supporting the employees in their hour of need as such.⁴⁰⁰

CONVERSION: to put in different from;

TRANSFORMATION: total change;

PIVOTAL: central point; **UNPRECEDENTED:** unexampled.

Handwritten notes in Devanagari script, likely a shorthand or summary of the text, covering the entire length of the printed text.

Exercise 12

My Government has worked continuously to strengthen the spirit of Cooperative Federalism enshrined in the Constitution. It has been the²⁰ endeavour of the Government to enable the State Governments to undertake development work in their respective States in a more⁴⁰ effective manner. In line with this objective, my Government took the decision to provide the States with 10 percent additional⁶⁰ share in taxes as per the recommendations of the Finance Commission. At this time, the whole world is talking about⁸⁰ Kumbh, underway at Prayagraj. For this colossal event, world-class infrastructure and other facilities on a permanent basis have been¹⁰⁰ developed at a fast pace. The confluence of Ganga-Yamuna-Saraswati is setting an impressive example of cleanliness and modern management.¹²⁰ Ganga is not just a river for us but, is like a mother to us, a living symbol of our¹⁴⁰ culture and faith. To keep Ganga clean is our sacred duty. Under the 'Namami Ganga Mission', projects worth Rs 25,000 crore¹⁶⁰ have been approved so far. My Government is engaged with the task of cleaning up of the river Ganga¹⁸⁰ by diverting dozens of major drains, stopping flow of industrial effluents and by setting up several Sewage Treatment Plants²⁰⁰ in the cities.

Honourable Members, Every citizen and the Government are duty bound to honour the contribution of National heroes.²²⁰ Carrying forward the tradition of honouring the builders of modern India, my Government has dedicated to the nation the 'National Salt Satyagraha Memorial'²⁴⁰ at Dandi on the death anniversary of Mahatma Gandhi. Kranti Mandir, a museum in Delhi dedicated to²⁶⁰ Netaji Subhash Chandra Bose has been opened to public this month. The Government has also instituted Netaji Subhash Chandra Bose Disaster Management Award²⁸⁰ in his honour. The Government has developed 5 sacred places associated with Baba Saheb Ambedkar as "Panchteerth".³⁰⁰ The nation has paid tribute to the Iron Man of India Sardar Patel, by building the 'Statue of Unity', which is the³²⁰ tallest statue in the world. My Government is setting up museums in various States in the memory of the³⁴⁰ country's tribal freedom fighters. My Government has conferred the Bharat Ratna on Mahamana Madan Mohan Malaviya and Atal Bihari Vajpayee³⁶⁰ in 2015. This year it has been decided to confer Bharat Ratna on Nanaji Deshmukh,³⁸⁰ Bhupen Hazarika and Pranab Mukherjee. By conferring national awards on the basis of merit and without any discrimination to those⁴⁰⁰ citizens, who have worked selflessly for the welfare of the people, my Government has demonstrated country's commitment towards the ideals⁴²⁰ of sacrifice and service. This month, to commemorate the Prakash Parv of Guru Govind Singhji, the Government has released a special coin.⁴⁴⁰

ENDEAVOUR: to try hard,

COLOSSAL: huge;

COMMEMORATE: to remember a special event.

EFFULENTS: liquid waste;

Handwritten notes in Urdu script, likely a student's attempt at shorthand or a translation of the English text. The notes are written in a cursive style and cover the right side of the page.

Exercise 13

Export competitiveness, however, is only a function of the competitiveness of the entire economy. The poor state of our infrastructure²⁰ is reducing our export competitiveness. The Government has given the highest priority to the development of our infrastructure. Our various⁴⁰ initiatives in this regard will start bearing fruit very soon. We have taken decisive action to speed up clearances for⁶⁰ power projects and to expand and upgrade our airports and ports. The Task Force on Infrastructure has formulated an ambitious⁸⁰ National Highway Development Project which I inaugurated in Bangalore earlier this month. Speed of movement of goods within the country,¹⁰⁰ and their shipment outside the country, is critical for the success of our export efforts. The Task Force will soon¹²⁰ present to the Government an Integrated National Transport Policy, whose aim will be to create fast communication links for people¹⁴⁰ and goods. Cheaper and reliable telecommunication links with the rest of the world are crucial for increasing the competitiveness of Indian exports.¹⁶⁰ A New Telecom Policy is now on the anvil. One of its major objectives is to rapidly increase tele-density¹⁸⁰ all over the country. It will ensure that the prices of domestic long-distance and international calls follow the global²⁰⁰ trend of sharp decline and become as cheap in India as in the rest of the developed world in the²²⁰ shortest possible time. The new Telecom Policy will also be a big boon to India's software exporters. You are already²⁴⁰ aware of the many steps taken by the Government to make India a superpower in Information Technology. We have²⁶⁰ received an excellent response from the industry in this regard. A recent happy development has been the signing of the²⁸⁰ Free Trade Agreement between India and Sri Lanka, which will bring closer economic integration in the South-Asian region.³⁰⁰ I am confident that this Agreement will lead to greater trade between our two countries which share so much in³²⁰ common. It will also lead to similar initiatives with our other neighbours in South Asia so that this region can³⁴⁰ become a closely-linked economic region with benefits flowing to all the countries. Friends, the global economic slow down in the³⁶⁰ last two years, coupled with the melt down in financial markets in East Asia and elsewhere, have hurt our exports. In³⁸⁰ such testing times, it is all the more necessary that you take this adverse development as a challenge for all here.⁴⁰⁰

I am happy to be with you this morning to participate in the India Tourism Day Celebrations. I congratulate all

Handwritten shorthand notes in Devanagari script, corresponding to the printed text on the left. The notes are written in a cursive style, using various symbols and abbreviations to represent the words and phrases of the original text.

those ⁴²⁰ who have been named for receiving the award. I call upon others to emulate the examples set by the award-winners, redouble your ⁴⁴⁰ efforts with a healthy competitive spirit, and work hard to achieve excellence in attracting more tourists - both ⁴⁶⁰ domestic and foreign. We all know that tourism generates many more jobs for relatively less investment. It is capable of ⁴⁸⁰ creating large-scale employment opportunities, particularly in rural and backward areas where there are many attractive sites for tourists. It ⁵⁰⁰ is, potentially, the biggest generator of foreign exchange. It is a non-polluting industry. While foreign tourists generate goodwill for India ⁵²⁰ around the world, domestic tourism is a powerful contributor to the cause of national integration. The Government has, therefore, accorded ⁵⁴⁰ high priority for the development of this sector through appropriate policies and programmes. Tourism has often been misunderstood as an ⁵⁶⁰ elitist activity without realizing its economic, social and civilization significance. Travel from one place to another for the purposes of ⁵⁸⁰ pilgrimage, pleasure, experience, education and business is not the exclusive privilege of any class of society but a universal ⁶⁰⁰ phenomenon. Tourism brings together people of different cultures and regions and fosters better mutual understanding. For doing this effectively and ⁶²⁰ durably, it demands conditions of peace. It is, therefore, rightly said that tourism is the greatest peace movement in the world. ⁶⁴⁰ Therefore, I commend all of you working to promote tourism in India for also promoting the larger goal of ⁶⁶⁰ peace and harmony around the world.

Friends, on a day like this it is natural for us to celebrate what ⁶⁸⁰ India has achieved in the field of tourism. But it is equally necessary to focus our attention on the gap ⁷⁰⁰ between our achievement and our own targets, and also the gap between the progress of tourism in India and that ⁷²⁰ in other countries of Asia and the world. If there is any destination in the world which offers the widest ⁷⁴⁰ choice to tourists, it is India. Nature tourism, culture tourism, exotic tourism, adventure tourism and spiritual tourism - we have ⁷⁶⁰ everything in India to cater to the diverse preferences of domestic and international tourists. Yet, our target of five million ⁷⁸⁰ foreign tourists have not been achieved, whereas even smaller countries are getting tens of millions of tourists. Why is this happening? ⁸⁰⁰ I readily acknowledge that, as in the case of other industries, inadequate infrastructure is a major constraint in the ⁸²⁰ development of tourism. The infrastructure for tourism includes not only hotels, restaurants and other site facilities but also basic amenities. ⁸⁴⁰

Handwritten notes in Progressive Shorthand script, corresponding to the printed text on the left.

TELE-DENSITY: telephone concentration; **EMULATE:** to copy;
ELITIST: upper sections of society; **FOSTER:** promote growth of;
COMMEND: to recommend favourably; **AMENITIES:** facilities.

Exercise 14

I have come here to see things for myself, tell you of our aims and ideals and find out your needs²⁰ and ambitions. I want to dispel any apprehensions you may have. For one thing I want to remove the impression⁴⁰ some people have that we harbour any ill-feeling towards Hyderabad on account of the past mistakes of some people here.⁶⁰ We harbour no such rancour. Let no one now nurse any ambitions to kill and gain so-called martyrdom.⁸⁰ Whatever is legal is fully acceptable, whatever the cost. Now it is up to the Ministers to see what is to be¹⁰⁰ done about past crimes. The people who were responsible for these things in a big way have already run away.¹²⁰ But I need your co-operation to ensure that no innocent person suffers in their stead.

Another thing I want to¹⁴⁰ say is that our decades of slavery not just in Hyderabad but all over India have left us inert. Our millions¹⁶⁰ of unemployed must be turned to productive work. In greater production lies India's redemption. Self-rule has raised many hopes and¹⁸⁰ expectations; but these can be met only out of greater production. There are some who think we should immediately apportion out²⁰⁰ whatever India has right now. But that would be a sharing of poverty. That the way the Communists want it²²⁰ to be done would be madness. Even their mentors, the Chinese, have not done it that way. Assault, murder and²⁴⁰ pillage among poor villagers is hardly the way to bring about Communism. It is a blot on Communism itself.²⁶⁰ I have said before, and let me warn again, that I will root out such people. I have not seen such²⁸⁰ atrocities anywhere. What I particularly deplore is the sources of these people's arms and ammunition. Who are the brains³⁰⁰ behind this kind of thing? Are they from outside Hyderabad? Or are they in the Nalgonda area? No, out there³²⁰ they would be picked up by the military. They are right here in Hyderabad or Secunderabad, sitting pretty.³⁴⁰ We have today given the Hyderabad administration an experienced person from our services to work as prime minister here. But we can³⁶⁰ ill afford to spare such people. We are very short of skilled administrators the kind of people who are serving³⁸⁰ you at the risk of their lives. There is some talk of natives and outsiders who are doing very well.⁴⁰⁰

About five or six crore rupees are being spent on the police. This is too much. Money would be⁴²⁰ much better spent

on the infra projects of irrigation, which will give us more foodgrains, more cotton.⁴⁴⁰ Hyderabad never lack these things if the local politicians and the Hyderabad people had been strong and wise. They have not⁴⁶⁰ even been able to handle the job of policing their area, with the result that police had to be⁴⁸⁰ brought from outside. Under such conditions, complaints against outsiders have no meaning. Recently there was some rioting and police firing⁵⁰⁰ in Raipur. It was noised abroad that it was food riot. For one thing, people with a family of⁵²⁰ four draw ration for fourteen, and still expect rationing to work. For another thing, there was enough stock of foodgrains⁵⁴⁰ in Raipur. But the way to get at it was to approach your own representatives in government, not to loot⁵⁶⁰ the store, stone the police and create disorder. This is no way to run Swarjya. such thing bring a bad⁵⁸⁰ name to your State. Hyderabad's bad reputation reflects on India's name. You may criticise the Government of India and its⁶⁰⁰ administration today. But tomorrow you will have to run your affairs yourselves. Let me warn you, power will come into⁶²⁰ your own hands very soon. It is your heritage and you will have it. But you must prepare yourselves⁶⁴⁰ for the responsibility; you must organize yourselves and have big hearts. The Congress too must do likewise. It should keep⁶⁶⁰ the door open for good men. Wise and able men, who want to take part in politics, should also be⁶⁸⁰ willing to follow the rules and disciplines involved in it.

I would therefore ask you to approach to Pakistan Prime Minister's⁷⁰⁰ assurance on the matter in a spirit of and a desire for, coming closer together than drifting apart.⁷²⁰ If we drift apart, the task of keeping minorities within the geographical limits of our respective frontiers would become immeasurably difficult,⁷⁴⁰ whereas if we make a genuine attempt at closer understanding with trust and confidence in each other, there is some⁷⁶⁰ chance of minorities on either side living a life of peace and security to which they are entitled under any⁷⁸⁰ civilised government. I regard it profitless at this stage to enter into any disputation of respective responsibility for the tragedies⁸⁰⁰ that have occurred on both sides of the border. I can tell my West Bengal friends quite candidly that⁸²⁰ it is the ugly and deplorable incidents which happened on our side of the border that made us.⁸⁴⁰

APPREHENSION: fear:

RENCOUR: ill will:

INERT: not able to move:

ATROCITIES: cruel treatment of somebody:

CANDIDLY: say exactly what you think.

Exercise 15

We know from experience that democratic societies which guarantee individual freedom and tolerance of dissent provide an environment most conducive²⁰ to creative endeavour, and the establishment of socially just societies. We therefore, have an obligation to help other countries⁴⁰ that aspire for the fruits of democracy. Just as developed industrial countries assist those that are less developed to accelerate development,⁶⁰ democratic societies with established institutions must help those that want to strengthen democratic values and institutions. In this spirit,⁸⁰ your President and I agreed yesterday on a global initiative to help build democratic capacities in all societies that seek¹⁰⁰ such assistance. The capacities we have in mind are those related to the electoral, parliamentary, judicial and human rights processes¹²⁰ of emerging democracies. Respect for cultural diversity, minority rights and gender equality is an important goal of this initiative.¹⁴⁰ Democracy is one part of our national endeavour, Development is the other. Openness will not gain popular support if an open society¹⁶⁰ is not a prosperous society. This is especially so in developing countries, where a large number of people have¹⁸⁰ legitimate material expectations which must be met. That is why we must transform India's economy, to raise the standard of living²⁰⁰ of all our people and in the process eliminate poverty.

India's aspirations in this respect are not different from²²⁰ those of other developing countries. But we are unique in one respect. There is no other country of a billion people,²⁴⁰ with our tremendous cultural, linguistic and religious diversity, that has tried to modernise its society and transform its economy²⁶⁰ within the framework of a functioning democracy. To attempt this at our modest levels of per capita income is a²⁸⁰ major challenge. We are determined to succeed in this effort. To achieve our developmental goals, our policies and strategies must be³⁰⁰ in step with changed circumstances and especially the opportunities now available in the global economy. Our Prime Minister, standing at this³²⁰ very podium two decades ago, spoke of the challenge of building anew on old foundations. He started a process³⁴⁰ of reorienting India's economic policies, which has been continued by successive governments. The economic policy changes that have been made³⁶⁰ in India have far-reaching implications. They have liberated Indian enterprise from government control and made the economy much more³⁸⁰ open to global flows of trade, capital and technology. Our entrepreneurial talent has been unleashed, and is encouraged to compete with the best.⁴⁰⁰

We will continue this process so that Indian talent and enterprise can realize its full potential,⁴²⁰ enabling India to participate

Handwritten shorthand notes corresponding to the printed text, written in a cursive style on lined paper.

in the global economy as an equal partner. We are often criticised for being too slow in making changes in policy, but democracy means having to build a consensus⁴⁴⁰ in favour of change. As elected representatives, you are all familiar with this problem. We have to clear the doubts⁴⁶⁰ and calm the fears that often arise when people face the impact of change. Many of the fears we have⁴⁸⁰ to address are exaggerated, but they must be addressed. This is necessary to ensure sustainability. India's economic reforms must be seen⁵⁰⁰ in this light: they may appear slow, but I assure you they are durable and irreversible. I am happy to say that⁵²⁰ our efforts at transforming India into an economy more integrated with the world have borne fruit. Our rate of growth⁵⁴⁰ of GDP has increased steadily, and has averaged around 6.0% per year over the⁵⁶⁰ past two decades. Poverty has declined although more slowly than we would like. We are determined to improve on this performance.⁵⁸⁰ We hope to raise our growth rate to 8% or so over the next two years, and⁶⁰⁰ we will ensure that this growth is "inclusive" so that its benefits are widely spread. For this we must act⁶²⁰ on several fronts. We must do much more in health and education, which are crucial for human development. We must⁶⁴⁰ continue to open up our economy. We must impart a new impetus to agricultural development. We must expand investment in⁶⁶⁰ economic infrastructure which is a critical constraint on our growth prospects.

India's growth and prosperity is in American interest.⁶⁸⁰ American investments in India, especially in new technology areas, will help American companies to reduce costs and become more competitive globally.⁷⁰⁰ Equally, India's earnings from these investments will lead to increased purchases from the United States. The information technology revolution in India⁷²⁰ is built primarily on US computer related technology and hardware. There are many other examples of such two-way benefits,⁷⁴⁰ with both sides gaining from the process. U.S. firms are already leading the foreign investment drive in India.⁷⁶⁰ I believe 400 of the Fortune 500 are already in India. They produce for the Indian market and⁷⁸⁰ will hopefully also source supplies from India for their global supply chains. We welcome this involvement and look forward⁸⁰⁰ to further expansion in the years ahead. India needs massive foreign direct investment, especially in infrastructure. I hope American companies will participate⁸²⁰ in the opportunities we are creating. The 21st Century will be driven by knowledge-based production in the world.⁸⁴⁰

ACCELERATE: to increase gradually;
TRANSFORM: complete change;
PODIUM: platform for speaker;
CONSENSUS: total agreement;
IMPETUS: to encourage change.

Handwritten shorthand notes corresponding to the text on the left, written in a cursive shorthand style.

Exercise 16

We believe that the private sector, both in agriculture and industry, will provide the needed thrust to economic growth.²⁰ However, Government will have to continue to play a crucial role in strengthening the social and physical infrastructure. This cannot happen⁴⁰ unless the fiscal health of the Government at the Centre and in the States improves considerably and gains strength. The⁶⁰ realization of the social and economic objectives of the Ninth Plan depends critically on our being able to finance public investment⁸⁰ in crucial areas of social and physical infrastructure. We will fail in our duty if we do not improve¹⁰⁰ the Central and State finances. The Centre has started taking certain firm measures to fulfil our responsibility. I urge the¹²⁰ State Governments, too, to put their finances in order.

Dear Chief Ministers, recent trends in this regard are alarming. States¹⁴⁰ own contribution to Plan financing has been almost non-existent. States are increasingly borrowing even to finance their current consumption.¹⁶⁰ Reluctance to mobilize additional resources to meet increasing expenditure is the reason for this. There is a need for austerity all¹⁸⁰ around to contain wasteful public expenditure. Revenue should be increased through a greater attention to efficiency and productivity of the²⁰⁰ enormous human and financial resources we invest in our various schemes. Can we accomplish this without a political consensus to²²⁰ end competitive populism? We are aware that the Centre has taken certain measures in recent years that have had serious²⁴⁰ though indirect, repercussions on State finances. As an example, I mention the implementation of the Fifth Pay Commission's recommendations. Adoption²⁶⁰ of these at the Centre has had a snowballing effect on States. I can assure you that we will be²⁸⁰ more considerate of States interests in such matters in future. Charity begins at home. I would say the same about³⁰⁰ cutting the Central Government's expenditure. I urge all Central Ministries to enforce expenditure management rigorously. Why should we not have³²⁰ more essential expenditure in the social sector. Today, there is both a need and scope to raise resources through levying³⁴⁰ reasonable electricity tariffs and irrigation charges. Untargeted and unintended subsidies often lead to distortions in resource allocation, besides failing to³⁶⁰ benefit the really poor. Reforms in the power sector, which we have been overdue must be quickly implemented by States.³⁸⁰ That will lead to better financial annotations of the power sector which under serves financial freedom for the time being.⁴⁰⁰

Handwritten notes in Urdu script, likely a transcription or commentary on the English text, covering the same paragraphs.

However, it is violated in many parts of the country. That should not be allowed.⁸⁴⁰

CRUCIAL: essential; AUSTERITY: economy;

REPURCUSSION: effect; DEVOLVE: spread;

IMBIBED: absorb, drink in; PARADOXICAL: inconsistency.

Exercise 17

The Annual Budget is also an opportunity for the Government to outline its priorities for the year to come. The priority²⁰ of our Government is clearly to provide additional resources for vulnerable sections, rural areas and social and physical infrastructure creation.⁴⁰ The Government shall also endeavour to continue with the ongoing reform programme and ensure the passage of the Constitutional amendments⁶⁰ to enable the implementation of the Goods and Service Tax, the passage of Insolvency and Bankruptcy law and other important⁸⁰ reform measures which are pending before the Parliament. Additionally, as I will detail later, we will undertake significant reforms, such as¹⁰⁰ the enactment of a law to ensure that all Government benefits are conferred upon persons who deserve it, by¹²⁰ giving a statutory backing to the AADHAR platform; bringing significant changes in the legislative framework relating to the transport sector¹⁴⁰ so as to free it from constraints and restrictions; incentivising gas discovery and exploration by providing calibrated marketing freedom; enactment¹⁶⁰ of a comprehensive law to deal with resolution of financial firms; providing legal framework for dispute resolution in PPP¹⁸⁰ projects and public utility contracts; undertaking important banking sector reforms and public listing of general insurance companies; and undertaking significant²⁰⁰ changes in FDI policy. Our agenda for the next year is, therefore, to 'Transform India' in this direction.²²⁰ My Budget proposals are, therefore, built on this transformative agenda with nine distinct pillars.

Let me first take up Agriculture²⁴⁰ and Farmers' Welfare. We are grateful to our farmers for being the backbone of the country's food security. We need²⁶⁰ to think beyond 'food security' and give back to our farmers a sense of 'income security'. Government will, therefore,²⁸⁰ reorient its interventions in the farm and non-farm sectors to double the income of the farmers by 2022.³⁰⁰ Our total allocation for Agriculture and Farmers' welfare is Rs.36, 000 crore. We need to address issues³²⁰ of optimal utilisation of our water resources; create new infrastructure for irrigation; conserve soil fertility with balanced use of fertilizer,³⁴⁰ and provide value addition and connectivity from farm to markets. Irrigation is a critical input for increasing agriculture production and³⁶⁰ productivity. Out of 141 million hectares of net cultivated area in the country, only 46% is³⁸⁰ covered with irrigation. The 'Pradhan Mantri Krishi Sinchai Yojana' has been strengthened and will be implemented in mission mode.⁴⁰⁰

Handwritten notes in Devanagari script, likely a shorthand or summary of the text, covering the same topics as the printed text.

Twenty eight lakh hectares will be brought under irrigation under this Scheme. Implementation of 89 irrigation projects under AIBP,⁴²⁰ which have been languishing, will be fast tracked. This will help to irrigate 80 lakh hectares. These projects require Rs.17, 000 crore⁴⁴⁰ next year and Rs.86,000 crore in the next five years. We will ensure that 23 of these projects are completed⁴⁶⁰ before this financial years. A dedicated Long Term Irrigation Fund will be created in NABARD with an initial corpus⁴⁸⁰ of about Rs.20,000 crore. To achieve all these, a total provision of Rs.12,000 crore has been made⁵⁰⁰ through budgetary support and market borrowings. Simultaneously, a major programme for sustainable management of ground water resources has been prepared⁵²⁰ with an estimated cost of Rs.6,000 crore and proposed for multilateral funding. At least 5 lakh farm ponds⁵⁴⁰ and dug wells in rain fed areas and 10 lakh compost pits for production of organic manure will be taken up⁵⁶⁰ by making productive use of the allocations under MGNREGA.

The Soil Health Card Scheme is now being implemented with⁵⁸⁰ greater vigour. Through this, farmers get information about nutrient level of the soil and can make judicious use of fertilizers.⁶⁰⁰ The target is to cover all 14 crore farm holdings by March 2017. Rs.300 crore has been⁶²⁰ provided for National Project on Soil Health and Fertility. Besides, 2,000 model retail outlets of Fertilizer companies will be⁶⁴⁰ provided with soil and seed testing facilities during the next three years. Fertilizer companies will also co-market city⁶⁶⁰ compost which increases the efficacy of chemical fertilizer. A policy for conversion of city waste into compost has also been⁶⁸⁰ approved by the Government under the Swachh Bharat Abhiyan. To increase crop yields in rain fed areas, which account for⁷⁰⁰ nearly 55% of the country's cultivable land, organic farming is being promoted. Towards this end, the Government has⁷²⁰ launched two important schemes. First, the 'Pamparagat Krishi Vikas Yojana' which will bring 5 lakh acres under organic farming⁷⁴⁰ over a three year period. Second, the Government has launched a value chain based organic farming scheme called "Organic Value⁷⁶⁰ Chain Development in North East Region". The emphasis is on value addition so that organic produce grown in these parts⁷⁸⁰ find domestic and export markets. A total provision of Rs.400 crore has been made for these schemes.⁸⁰⁰ Access to markets is critical for the income of farmers. The Government is implementing the⁸²⁰ Unified Agriculture Marketing Scheme which envisages a common e-market platform that will be deployed in selected 585 regulated wholesale markets.⁸⁴⁰

VULNERABLE: to be hurt easily; **INSOLVENCY/BANKRUPTCY:** state when property is less than liability; **PRODUCTIVITY:** output/input ratio; **LANGUISHING:** to lose strength; inert **JUDICIOUS:** ideal, balanced.

Handwritten notes in Urdu script, likely a translation or commentary on the English text, covering the same topics: irrigation projects, NABARD fund, groundwater management, Soil Health Card Scheme, organic farming, and market access.

Exercise 18

Government has approved the path breaking Crop Insurance Scheme, namely, 'Prime Minister Fasal Bima Yojana'. For effective implementation of this²⁰ Scheme, I have provided a sum of Rs.5,000 crore in the Budget. We have⁴⁰ to ensure that the benefit of Minimum Support Price reaches farmers in all parts of the country. Three specific initiatives⁶⁰ will be taken up in this year to for this. First, the remaining States will be encouraged to take up decentralized procurement. Second,⁸⁰ an online Procurement System will be undertaken through the Food Corporation of India. This will usher in transparency and convenience¹⁰⁰ to the farmers through prior registration and monitoring of actual procurement. Third, effective arrangements have been made for pulses procurement.¹²⁰ Farmers also take up other allied activities to supplement their family income. To make dairying more remunerative to the farmers,¹⁴⁰ four new projects will be taken up: first, the 'Pashudhan Sanjivani', an animal wellness programme and provision of Animal Health Cards¹⁶⁰ second, an Advanced breeding technology; third, Creation of 'E-Pashudhan Haat', an e market portal for connecting breeders and farmers;¹⁸⁰ and fourth, a National Breeding Centre for indigenous breeds. These projects will be implemented at a cost of Rs.850 crores²⁰⁰ over the next few years.

After agriculture, I now turn to the other segments of the rural economy. A sum of Rs.3 lakh crore will²²⁰ be given as Grant in Aid to Gram Panchayats and Municipalities as per the recommendations of the²⁴⁰ 14th Finance Commission. This is a quantum jump of 228% compared to the previous five year period.²⁶⁰ The funds now allocated, translate to an average assistance of over Rs.80 lakh per Gram Panchayat and over Rs.21 crore²⁸⁰ per Urban Local Body. These enhanced allocations are capable of transforming villages and small towns. Ministry of Panchayati Raj³⁰⁰ will work with the States and evolve guidelines to actualise this. There is an urgent need to focus on areas of³²⁰ drought and rural distress. Every block in these distress areas will be taken up as an intensive Block under the³⁴⁰ Deen Dayal Antyodaya Mission. Formation of Self Help Groups will be speeded up to promote multiple livelihoods. Cluster Facilitation Teams³⁶⁰ will be set up under MNREGA to ensure water conservation and natural resource management. These districts would also be taken up³⁸⁰ on priority under Pradhan Mantri Krishi Sinchayi Yojna. A sum of Rs.38,500 crore has been allocated for MNREGA.⁴⁰⁰

Three Hundred Urban Clusters will be developed under the Shyama Prasad Mukherjee Urban Mission launched by the Honourable Prime Minister⁴²⁰ recently. These Clusters will enhance

Handwritten notes in Devanagari script, likely a shorthand or summary of the printed text, covering the same topics: Crop Insurance Scheme, procurement, animal welfare, rural economy, and urban clusters.

growth centres in rural areas by providing infrastructure amenities and market access for the farmers.⁴⁴⁰ They will also expand employment opportunities for the youth. Swachh Bharat Mission is India's biggest drive to improve sanitation and⁴⁶⁰ cleanliness, especially in rural India. This subject was very close to the heart of the Father of the Nation. For the⁴⁸⁰ first time since Independence, the Parliament held a comprehensive debate on sanitation. This has become a topic of discussion⁵⁰⁰ in almost every home. We have introduced ranking of urban areas in sanitation which has resulted in constructive competition among⁵²⁰ towns and cities. Rs.9,000 crore has been provided for Swachh Bharat Abhiyan. In order to continue this momentum,⁵⁴⁰ priority allocation from Centrally Sponsored Schemes will be made to reward villages that have become free from open defecation. We⁵⁶⁰ need to derive greater benefit from our demographic advantage. We need to spread digital literacy in rural India. Of the⁵⁸⁰ 16.8 crore rural households as many as 12 crore households do not have computers and are unlikely⁶⁰⁰ to have digitally literate persons. We have already approved two Schemes to promote digital literacy: National Digital Literacy Mission; and⁶²⁰ Digital Saksharta Abhiyan.

We now plan to launch a new Digital Literacy Mission Scheme for rural India to cover around⁶⁴⁰ 6 crore additional households within the next 3 years. Details of this scheme will be spelt out separately. Modernisation⁶⁶⁰ of land records is critical for dispute free titles. The National Land Record Modernisation Programme has been revamped under the⁶⁸⁰ Digital India Initiative and will be implemented as a Central sector scheme with effect from 1st April, 2017.⁷⁰⁰ The revamped Programme will build an integrated land information management system. Rs.150 crore has been provided for this⁷²⁰ purpose. When asked what he intends doing for regeneration of India, Swami Vivekananda had said "no amount of politics would be⁷⁴⁰ of any avail until the masses in India are well educated, well fed and well cared for".

I now⁷⁶⁰ proceed to present the key elements of my proposals in the Social Sector. In our country, cooking gas cylinders were⁷⁸⁰ considered an upper middle class luxury. Gradually it spread to the middle class. But the poor do not have access⁸⁰⁰ to cooking gas. Women of India have faced the curse of smoke during the process of cooking. According to experts⁸²⁰ having an open fire in the kitchen is like burning 400 cigarettes an hour. We have to remedy it.⁸⁴⁰

USHER: to begin; TRANSPARENCY: openness;

DEFECATION: cleansing;

REVAMPED: re-strengthened;

TRANSFORMING: change to another form.

Handwritten notes in shorthand script, likely representing the content of the typed text on the left, written in a cursive style.

Exercise 19

We have decided to embark upon on a massive mission to provide LPG connection in the name of²⁰ women members of poor households. I have set aside a sum of Rs.2,000 crore in this year's Budget⁴⁰ to meet the initial cost of providing these LPG connections. This will benefit about 1 crore 50 lakh⁶⁰ households below the poverty line in 2016-17. The Scheme will be continued for at least two more years⁸⁰ to cover a total of 5 crore BPL households. This will ensure universal coverage of cooking gas¹⁰⁰ in the country. This measure will empower women and protect their health. It will reduce drudgery and the time¹²⁰ spent on cooking. It will also provide employment for rural youth in the supply chain of cooking gas. I want¹⁴⁰ to take this opportunity to express our gratitude and appreciation for the 75 lakh middle class and lower middle class¹⁶⁰ households who have voluntarily given up their cooking gas subsidy, in response to the call given by the Hon'ble Prime Minister.¹⁸⁰ Their gesture is a matter of pride for the country.

Catastrophic health events are the single most important cause²⁰⁰ of unforeseen out-of-pocket expenditure which pushes lakhs of households below the poverty line every year. Serious illness of²²⁰ family members cause severe stress on the financial circumstances of poor and economically weak families, shaking the foundation of their²⁴⁰ economic security. In order to help such families, the Government will launch a new health protection scheme which will provide²⁶⁰ health cover up to Rs.1 lakh per family. For senior citizens of age 60 years²⁸⁰ and above belonging to this category, an additional top-up package up to Rs.30,000 will be provided. Making quality medicines³⁰⁰ available at affordable prices has been a key challenge. We will reinvigorate the supply of generic drugs. 3,000 Stores³²⁰ under Prime Minister's Jan Aushadhi Yojana will be opened.

About 2.2 lakh new patients of End Stage Renal Disease³⁴⁰ get added in India every year resulting in additional demand for 3.4 crore dialysis sessions. With approximately³⁶⁰ 5,000 dialysis centres in India, largely in the private sector and concentrated in the major towns, the demand is³⁸⁰ only half met. Every dialysis session costs about Rs.2,000 – an annual expenditure of more than Rs.3 lakh.⁴⁰⁰

To address this situation, I propose to start a 'National Dialysis Services Programme'. Funds will be made available through⁴²⁰ PPP mode under the National Health Mission, to provide dialysis services in all district hospitals. To reduce the cost,⁴⁴⁰ I propose to exempt certain parts of dialysis equipment

Handwritten notes in Urdu script, likely a translation or summary of the text, covering the same topics: LPG connections, health protection scheme, and dialysis services.

from basic customs duty etc. Scheduled Caste and Scheduled Tribe entrepreneurs⁴⁶⁰ are beginning to show great promise in starting and running successful business enterprises. The Prime Minister had given a call⁴⁸⁰ for promoting entrepreneurship among SC/ST to become job providers rather than job seekers. I am happy to⁵⁰⁰ inform you that the Union Cabinet has approved the "Stand Up India Scheme" to promote entrepreneurship among SC/ST⁵²⁰ and women. Rs.500 crore has been provided for this purpose. The Scheme will facilitate at least two⁵⁴⁰ such projects per bank branch, one for each category of entrepreneur. This will benefit at least 2 lakh entrepreneurs.⁵⁶⁰ We are celebrating the 125th Birth Anniversary of Dr. B.R. Ambedkar. This must become the Year of Economic Empowerment for⁵⁸⁰ SC/ST entrepreneurs. We have extensively interacted with the Dalit India Chamber of Commerce and Industry on building an entrepreneurship eco-system.⁶⁰⁰ It is proposed to constitute a National Scheduled Caste and Scheduled Tribe Hub in the MSME Ministry in partnership⁶²⁰ with industry associations. This Hub will provide professional support to Scheduled Caste and Scheduled Tribe entrepreneurs to fulfil the⁶⁴⁰ obligations under the Central Government procurement policy 2012, adopt global best practices and leverage the 'Stand Up India'⁶⁶⁰ initiative.

The schemes for welfare and skill development for Minorities such as Multi-sectoral Development Programme and USTAAD shall be⁶⁸⁰ implemented effectively. I would now like to highlight the steps proposed to be taken under education, skill development and job creation⁷⁰⁰ which is the fourth pillar of my Budget proposals. After universalisation of primary education throughout the country, we want to take⁷²⁰ the next big step forward by focusing on the quality of education with 62 new Navodaya Vidyalayas in the current year.⁷⁴⁰ To help Students, Higher Education Institutions and Employers to access degree certificates of candidates, it is proposed to establish a Digital⁷⁶⁰ Depository for School Leaving Certificates, College Degrees, Academic Awards and Mark sheets, on the pattern of a Securities Depository.⁷⁸⁰ This will help validate their authenticity, safe storage and easy retrieval. "Skill India" mission seeks to capitalise our demographic advantage.⁸⁰⁰ Since its launch, the National Skill Development Mission has created an elaborate skilling eco-system and imparted training to 76 lakh⁸²⁰ youth. We want to bring entrepreneurship to the doorsteps of youth through Prime Minister Skill Development Mission this year.⁸⁴⁰

DRUDGERY: dull & laborious work; **CATASTROPHIC:** overturning;
REINVIGORATE: to revigour; **DIALYSIS:** treatment for kidney patients;
AUTHENTICITY: genuine, real.

Handwritten notes in Urdu script, likely a shorthand or summary of the text, covering the same topics as the printed text.

Exercise 20

Sir, just to begin with the discussion on the Demands for Grants for the Ministry of Commerce. I will congratulate the Minister of Commerce²⁰ because at least, we have got this year a thicker report pertaining to the performance of the Ministry than the⁴⁰ report presented last year. It has, in fact, become a bulky report this year because of certain extra activities,⁶⁰ increased activities in certain spheres of the Ministry. The Ministry of Commerce mainly deals with the foreign trade and also⁸⁰ certain industries which are export oriented, producing commodities for marketing in the outside countries. We think that the earning¹⁰⁰ is a subsidiary rather than complimentary to the total economy of the nation and it should supplement certain aspects of¹²⁰ the economic growth and development of the country. We have certain governmental obligation and responsibilities of maintaining relations with other¹⁴⁰ countries and for that we require foreign exchange. For the development of big industries and overall industrial growth inside our¹⁶⁰ country we require certain machinery and equipment to be imported and for that also, we require foreign exchange. Our country¹⁸⁰ was under colonial rule for about 200 years, certain industries have been developed in our country and the commodities²⁰⁰ manufactured by these industries have got to be exported. We have certain obligations in this regard.

That is true, but²²⁰ what we see at the present moment is as if the entire economy of our country rests on the possibility²⁴⁰ of increase in export or the development of export trade in our country. Just now we were discussing the Demands²⁶⁰ for Grants of the Ministry of Energy. There also we have found that essential commodity like coal²⁸⁰

we cannot supply²⁸⁰ to the rural villages in our country where the fuel scarcity is immense and there are certain other spheres³⁰⁰ also like agriculture. Also in urban areas, in the industrial field, coal is essential for development of the economy. In³²⁰ the domestic sphere we cannot use coal because we have not got the infrastructure of developing industries in our³⁴⁰ own country, and also we cannot supply the essential fuel and other necessities to the rural people, millions of our³⁶⁰ people. We have not got that market possibility. We have not developed such market possibilities in our country. Our economy is³⁸⁰ such that we have to depend upon foreign aid or some export earnings and by exporting our own essential commodities.⁴⁰⁰

This is the position of the economy of our own country and our export policy has become such that we⁴²⁰ have to

Handwritten shorthand notes corresponding to the printed text on the left, written in a cursive shorthand style on lined paper.

find out a market every day and also a market for every item of commodity which we are going⁴⁴⁰ to produce in our country. Unless we get such market every day and every moment, our economy is going to⁴⁶⁰ suffer in many respects. In the Economic Survey of 2012 which has been presented recently, concern⁴⁸⁰ has been expressed over the larger deficit in the trade account. It is true that this year the deficit in⁵⁰⁰ the trade account has become the largest of all the years since our Independence. It has been shown that because⁵²⁰ of the imports of certain commodities like food, fertiliser and oil and also because of the inflationary prices prevailing in⁵⁴⁰ the world market for these commodities, the import prices have gone up so high that the export earnings have failed⁵⁶⁰ to keep pace with the high prices for imports. That is, in a sense, well as those shown in the Economic Survey of India, you will⁶⁰⁰ find that in the last year we imported food not in a larger quantity than of the previous year.⁶²⁰ Crude oil too was also not imported in a larger quantity than that of the previous year. Actually, if we⁶⁴⁰ calculate the actual quantum of imports, it has gone down since the previous year, but the prices have gone up.⁶⁶⁰ The money value of imports has gone up but the quantum of imports has gone down and in order to⁶⁸⁰ keep pace with that, we are going in for export of each and every item. It has already been stated⁷⁰⁰ in the Report that the developed countries are going to import less and less from our country. Our exports to⁷²⁰ North America and in particular to the USA, East European countries, as well as Euro Zone countries are⁷⁴⁰ going down and down, and for that reason we are going to explore new markets in African countries. I apprehend, in this⁷⁶⁰ way we cannot build a strong market and cannot have a concrete base for our export market, if we,⁷⁸⁰ just for this year, take up certain commodities to fit into the demands of the new markets and after two⁸⁰⁰ or three years they will stop importing those articles, we shall have to roam about and find out other market.⁸²⁰ If our policy goes on like this, then we will not be able to have a stable export market.⁸⁴⁰

SUBSIDIARY: supporting
SUPPLEMENTARY: additional;
IMMENSE: huge;
APPREHEND: fear.

Exercise 21

Henceforth you are going to have elected municipalities. The elections will be on the basis of adult franchise which is being²⁰ established everywhere in India now. It is rather difficult for people to make good use of their franchise when⁴⁰ most of them are illiterate and inexperienced, but it is the call of the times and we cannot act in any other way.⁶⁰ One man's rule is much easier. It works more expeditiously and efficiently, if he is the right man.⁸⁰ On the other hand, popular rule is very difficult. It cannot be speedy. Everyone's opinion has to be taken¹⁰⁰ and all sorts of influences, pulls and pressures cause work to be done less efficiently than could otherwise be¹²⁰ the case. The services who run the administration have to adjust themselves. Hyderabad's economy today is in a bad way.¹⁴⁰ It has to be improved. The countryside needs hospitals, medicines and equipment. It needs education as much as food.¹⁶⁰ The masses will not know the difference that freedom makes to their lives except through a better and easier fulfilment¹⁸⁰ of these needs.

If we do not spend crores on maintaining the kind of army that will ensure India's integrity,²⁰⁰ we would be defaulters. One has to keep in view what a neighbour does. Pakistan says it has one enemy²²⁰ in the world India. As this is their openly declared opinion, we have to remain alert. I would rather wish that there were²⁴⁰ on fighting between India and Pakistan. Those who want war are insane. We have no such desire.²⁶⁰ We have to create conditions in both countries in which Hindus and Muslims can live happily together. Especially in Hyderabad,²⁸⁰ I want to say, let us bury the past. The clean thing is to purge our hearts of animosity,³⁰⁰ now that we have broadly achieved what we wanted. It is cowardice to hit a fallen person. We should rather give³²⁰ him a helping hand and lift him up. The Muslims here are not foreigners. They are from among ourselves. Gandhiji always³⁴⁰ proclaimed that if we want true Swarjya, we should do away with untouchability; we should unite Hindus and Muslims.³⁶⁰ If we want to improve our economic condition, we should make our own cloth. Besides, we should have one national language.³⁸⁰ On these four pillars Gandhiji tried to build Indian Swarajya to the end of his life. I was associated with him.⁴⁰⁰

Minutes later a mad man killed him. But his words live on in my mind. What did he want at that⁴²⁰ moment? He had wanted to go to Karachi to convince the Muslim majority there that it was in their⁴⁴⁰ interest to keep the Hindus well, just as he had tried to convince the Hindus here. He had worked for⁴⁶⁰ this

day and night, in the capital and the countryside, because otherwise peace in the country was impossible. To Muslims⁴⁸⁰ in India, I appeal for a change of heart in the interests of amity. They should also tell Pakistan that fighting⁵⁰⁰ solves no problems. Instead of the fighting that has been going on for two or three years, let them convince the⁵²⁰ Kashmiri Muslims. If they favour Pakistan, we are not the ones to keep them forcibly. But they want to remain⁵⁴⁰ with us. Ours is a secular state. It was not made secular for a few Kashmiri Muslims. There are three crores⁵⁶⁰ other Muslims too in India, almost as many as there are in Pakistan. Each one of these should⁵⁸⁰ try to convince their relations and friends of the futility of conflict. Let us end the era of conflict.⁶⁰⁰ Let them run their own affairs and leave us to run ours, instead of pulling our legs. Only then can cordiality.⁶²⁰ prevail. Let us settle the points at issue. There is enough water in the Indus and the Punjab rivers⁶⁴⁰ for both countries. Let us sit down and talk it over peacefully.

We have recently concluded an agreement after seven days⁶⁶⁰ of discussion. But the agreement will be deemed to have succeeded only if Hindu migrants return to Pakistan and⁶⁸⁰ Muslim migrants return to India. Otherwise all talk of implementation of agreement will be merely empty words. In our secular state,⁷⁰⁰ we have tried to ensure that the Muslims enjoy all their rights as equal citizens. Any violation of this leads⁷²⁰ to reaction which is undesirable. We have trouble coping with such reaction. Pakistan met the same problem by just eliminating⁷⁴⁰ its communal question: they have evicted the minority. That kind of approach makes nonsense of the talk of amity.⁷⁶⁰ I am sure they will have to agree ultimately to let the Hindus return to their homes and restore their properties.⁷⁸⁰ The same will hold good for Muslims here. The Muslims of Hyderabad should live in full confidence and security.⁸⁰⁰ They are citizens of India with the same rights as other citizens. If we cannot guarantee this, we are unfit⁸²⁰ to rule. We have to banish discrimination of caste and creed from Hyderabad. Hindus and Muslims must unite and improve.⁸⁴⁰

FRANCHISE: right to vote;
EXPEDITIOUSLY: quickly;
ELIMINATING: to delete;
BANISH: to ban.

Handwritten shorthand notes in Devanagari script, corresponding to the typed text on the left. The notes are written in a cursive style, using various symbols and abbreviations to represent the words and phrases of the original text.

Exercise 22

Sir, there is also the very big responsibility of the foreign trade to meet the minimum requirements of the country²⁰ especially requirements of essential goods of mass consumption which may be in short supply from time to time to save⁴⁰ our people from the evil effects of profiteering when such a situation arises. In this the strategy you have adopted⁶⁰ is, as my distinguished friend has pointed out, merely to rely on one single agency and the single agency seems to⁸⁰ be getting bigger and bigger every day, a giant who is becoming more and more inefficient. Now, I would¹⁰⁰ like to say a few words about the direction of our trade. In times to come, in the foreseeable future,¹²⁰ about Russia, USA, EEC countries and Japan will continue to be our major partners¹⁴⁰ in foreign trade. There is no doubt in my mind. But surely we should aim at our neighbouring¹⁶⁰ countries. I would in this connection draw the attention of the Commerce Minister to the fact that our trade with¹⁸⁰ every single neighbouring country in South Asia has declined. This is a sad commentary, it is a bad state of²⁰⁰ affairs. It is not a good augury for the future we envisage for this zone. I would like the Commerce²²⁰ Minister to plan steadily in a manner so that we do not compete against Bangladesh or any of our immediate²⁴⁰ neighbouring countries such as Sri Lanka. Together we should develop a strategy of going along with them. We should build up²⁶⁰ such capacities so that there is more exchange of goods between our country and our neighbouring countries.

Export subsidy has²⁸⁰ been mentioned. I find that in a few years time from a paltry sum of Rs.35 crores the³⁰⁰ subsidy has come to over 600 crores. How long shall our foreign trade need this crutch? This is³²⁰ a question which has to be put seriously and answered seriously. Any type of trade which cannot stand on its³⁴⁰ own without subsidy even for five years or ten years should be taken off the list. It should not be³⁶⁰ in our export list at all. It should be discarded. There are fresh pastures which we can explore. The export³⁸⁰ quota I hope the Minister knows is transferrable. And it is being transferred from one party to the other.⁴⁰⁰

We have had the exports zones of Kandla and Santa Cruz. After thirty years their total export turnover is of the⁴²⁰ order of Rs.150 to Rs.200 crores. I think this is a disgrace, I think this whole experiment needs⁴⁴⁰ to be reviewed. The Minister announced a special relief for 100 per cent export

Handwritten notes in Progressive Shorthand (Monthly) script, corresponding to the typed text on the left. The notes are written on lined paper and include various symbols and abbreviations used in shorthand.

oriented industries as a⁴⁶⁰ New Year Gift at the end of this year. I think it was a gift only for the monopolists and for⁴⁸⁰ the multinationals. I think its impact on our indigenous trade should be looked into.

Mr. Vice Chairman, Sir, I would⁵⁰⁰ like to mention something about our joint ventures. I know that the joint ventures have been part and parcel of⁵²⁰ our policy of export promotion and also of economic co-operation with the other developing countries. But I find that, after⁵⁴⁰ so many years these 115 units that are in operation have made a total investment of just⁵⁶⁰ Rs.35 crores only and this is an insignificant sum if you take each individual country and relate it to⁵⁸⁰ the total industrial investment in that country. Our resources are limited and I think we should concentrate on areas which⁶⁰⁰ are of immediate interest to us and it is in these areas that we should really build up our joint⁶²⁰ venture capacity. As for the international environment, we know what the Honourable Minister has confessed in the House and⁶⁴⁰ I would like to quote his words. He has said that the new international economic order and the North-South⁶⁶⁰ dialogue have failed. I think the new international economic order was perhaps a still born child. It was a device by⁶⁸⁰ some vested interests who were trying to arrange a certain recycling of resources and once that recycling of petro-dollars⁷⁰⁰ was achieved, then there was nothing left to talk about and the people have been taken for a ride. The⁷²⁰ U.N. has failed to evolve a strategy for development in this decade. The technical co-operation among the developing countries⁷⁴⁰ has failed to take off. The UNCTAD and the ESCAP are⁷⁶⁰ today the responsibility of the Ministry of Commerce and they have given birth to a plethora of committees and sub-committees⁷⁸⁰ and working groups and expert committees and what not. I wonder what contribution that have made to the promotion of⁸⁰⁰ our trade. Sir, I feel that the Ministry of Commerce should not waste its time in dealing with these organisations,⁸²⁰ otherwise, it shall be too late to correct the imbalance in our trade which is becoming bad to worse.⁸⁴⁰

STEADILY: resolute, stable; **EXPLORE:** to discover;

MONOPOLISTS: sole supplier;

IMPACT: effect; **PLETHORA:** over-supply.

Exercise 23 (Legal)

It is clear from the discussion made hereinabove that the said case was not one relating to compounding of offence.²⁰ Apart from that the Court found that the dues of the Banks have been satisfied by receiving the money and the⁴⁰ suits filed by the Bank in the Civil Court have been compromised. The FIRs were filed in⁶⁰ 1987-1988 and the investigation had not been completed till 1991. On those⁸⁰ facts the Court, rendering the judgment in July, 1996, felt that having regard to the lapse of time¹⁰⁰ and also having regard to the fact that there is a compromise decree satisfying the Banks' dues, there is no¹²⁰ purpose in allowing the criminal prosecution to proceed. On these consideration, this Court, held the provision of Section 482¹⁴⁰ of Criminal Procedure Code. In the facts of that case the learned Judges held that the Bank filed suits¹⁶⁰ for recovery of the dues on account of grant of credit facility and the suits have been compromised on receiving¹⁸⁰ the payments from the company concerned. The learned Court held it an offence of cheating is prima facie constituted, such²⁰⁰ offence is a compoundable offence and compromise decrees passed in the suits instituted by the Banks, for all intents and²²⁰ purposes amount to compounding of the offence of cheating. In that case the Court came to the conclusion since the²⁴⁰ claims of the Banks have been satisfied and the suits instituted by the Banks have been compromised on receiving payments,²⁶⁰ the Court felt that the complaint should not be perused any further and, therefore, the Court, the decision of²⁸⁰ the High Court in quashing the complaint does not require any interference under Article 136 of the Constitution.³⁰⁰

It is, therefore, clear that no legal proposition has been laid down on the compounding of offence in Duncans Agro.³²⁰ This Court proceeded on the peculiar facts of the case discussed above. Therefore, the said decision cannot be³⁴⁰ an authority to contend that by mere sanctioning of a scheme, the offences committed by the appellant company, prior to the scheme,³⁶⁰ stand automatically compounded. Reliance was also placed on the decision of this Court in the case of CBI, New Delhi³⁸⁰ reported in 5 SCC 257. In that case reliance was placed on the decision of this Court in Duncans Agro as such.⁴⁰⁰

The Court found that the aforesaid scheme being a voluntary scheme introduced by the Government of India

Handwritten notes in Urdu script, likely a summary or commentary on the legal text. Key phrases include: "FIRs", "1987-1988", "1991", "1996", "Section 482", "Criminal Procedure Code", "cheating", "prima facie", "compoundable offence", "Article 136", "Constitution", "Duncans Agro", "CBI, New Delhi", "5 SCC 257".

has provided that if the⁴²⁰ dispute and demand is settled by the authority and pending proceedings were withdrawn by an importer the balance demand against⁴⁴⁰ the importer shall be dropped and the importer shall be immune from any penal proceedings under any law. The Court⁴⁶⁰ also came to the conclusion that under the Customs Act, 1962 the appellant have been discharged and the⁴⁸⁰ scheme granted them immunity from prosecution. On those facts the Court held that the immunity which has been granted under the⁵⁰⁰ provisions of Customs Act will also extend to such offences that may, prima facie, be made out on identical⁵²⁰ allegation, namely, evasion of customs duty and violation of any notification under the said Act. The Court also found, on⁵⁴⁰ a reading of the chargesheet and the FIR that there was no allegation against the appellant of any⁵⁶⁰ intentional deception or of fraudulent or dishonest intention. On those facts the Court held that once a civil case has⁵⁸⁰ been compromised and the alleged offence has been compounded, the continuance of the criminal proceedings thereafter would be an abuse⁶⁰⁰ of the judicial process. Reliance was also placed on the judgment of this Court in the case of CBI and other.⁶²⁰

In paragraphs 30 and 31 of the judgment this Court held that dispute between company and the Bank have been⁶⁴⁰ set at rest on the basis of compromise arrived at between them. The Court noted that Bank does not have⁶⁶⁰ any claim against the company. The Court poses the question whether the power of quashing criminal proceeding was suffering from⁶⁸⁰ some disability, a person to represent the aforesaid category of persons is only competent to compound the offence and in such⁷⁰⁰ cases the permission of the Court is statutory required. Section 320 (4) (b) also reiterates the same principle⁷²⁰ by providing that when a person who is otherwise competent to compound an offence is dead, his legal representatives, as⁷⁴⁰ defined under the Code of Civil Procedure may, with the consent of the Court, compound such offence. Therefore, representation of⁷⁶⁰ the person compounding has been statutorily provided in all situations. Relying on the aforesaid clause in Section 147⁷⁸⁰ of the N.I. Act, learned counsel for the appellant argued that a three Judge Bench decision of this Court⁸⁰⁰ in Damodar case, held that in view of the clause in Section 147 of N.I. Act, which is⁸²⁰ a special statute, the requirement of consent of the person compounding in Section 320 of the Code is not required⁸⁴⁰ in the case of compounding of an offence under N.I. Act. This Court is unable to accept the aforesaid contention for various reasons.⁸⁴³

PROSECUTION: suing in a court;

IMMUNITY: exemption;

REITERATES: to state again;

STATUTE: codified law.

Exercise 24

Mr. Deputy Speaker, I have great pleasure in taking part in the debate relating to the Demands for Grants for²⁰ this Ministry of Home Affairs. The Minister of Home Affairs occupies an important position in the Central Executive, and the⁴⁰ Central Executive under the Constitution is vested with wide powers. It is because of the wide powers and the unique⁶⁰ position under the Constitution that it is able to hold the country united in spite of various diversities of language,⁸⁰ religion and other things. Therefore, this unique position should not be disturbed even when we think of amendment to the¹⁰⁰ Constitution at any time. The Home Ministry had a difficult time during the year in retrospect. The whole country was¹²⁰ in turmoil politically and economically. The articles of consumption were scarce, prices were soaring high and there was large scale¹⁴⁰ black marketing and smuggling and in this turmoil some Opposition parties, I do not say all the Opposition parties, but¹⁶⁰ some of them campaign, civil disobedience in the whole country from the 29th June and paralyse the Government, to subvert¹⁸⁰ democracy and the Constitution. This act of the opposition can not¹⁹⁰ be accepted by the present Govt. Any Government worth its²⁰⁰ name had to prevent it and to take effective steps to bar such a move and this law which was²²⁰ proclaimed by the President on the advice of the Government, saved the whole country from destruction. It is no²⁴⁰ good complaining that during the period under review civil liberties are curtailed, democratic rights are abrogated and so on. But who is²⁶⁰ responsible for this? As my friend who has just spoken, said that they were responsible for creating such a situation. Freedom²⁸⁰ of speech, freedom of realisation does not imply unrestrained freedom or unrestrained rights. Where there is a right, there is³⁰⁰ a duty. Every right has to be exercised in such a way that it does not cause any hardship to³²⁰ the other who has the same right. It is no good complaining. But let us see the results that³⁴⁰ accrued from this period. There is all round discipline. You now find discipline in the House. All the Members³⁶⁰ are highly disciplined. They are speaking within their limit and the work is going on according to the schedule. There is³⁸⁰ no backlog. I am very happy to see that emergency has produced the desired effect even on Members of Parliament.⁴⁰⁰

We face a changed situation. I am told, and I hope

Handwritten shorthand notes in a cursive style, corresponding to the printed text on the left. The notes are written on lined paper and cover the right half of the page.

Exercise 25 (Legal)

Having considered the reasoning given by the learned arbitrator, we are of the opinion that the interpretation by the learned²⁰ arbitrator was both possible as well as plausible. Therefore, merely because some other view could have been taken, the High Court⁴⁰ is not justified in interfering with the interpretation made by the arbitrator which as observed was possible and plausible.⁶⁰ Therefore, in the facts and circumstances of the case, we are of the opinion that the High Court has clearly⁸⁰ exceeded in its jurisdiction in interfering with the award passed by the learned arbitrator with respect to claim no.1¹⁰⁰ price adjustment and escalation. At this stage, it is required to be noted that though the High Court has observed¹²⁰ that the award passed by the learned arbitrator with respect to claim no.1 was against the public policy,¹⁴⁰ with respect, we do not see any element of public policy.

It was pure and simple case of interpretation of the¹⁶⁰ relevant clauses of the agreement which does not involve any public policy. Therefore, we are of the opinion that the¹⁸⁰ impugned judgment and order passed by the High Court for quashing and setting aside the award passed by the²⁰⁰ learned arbitrator with respect to claim no.1 price adjustment and escalation cannot be sustained and the same deserves to be²²⁰ quashed and set aside. Now so far as claim no.2 "fixed costs" and an amount of Rs.78 crores²⁴⁰ awarded by the learned arbitrator with respect to compensation of loss is concerned, having gone through the²⁶⁰ relevant material on record, we are of the opinion that the High Court has rightly set aside the award passed²⁸⁰ by the learned arbitrator with respect to claim no.2. Except the CA's certificate, no further evidence had been³⁰⁰ led with respect to actual loss. Considering the material on record, it is on the contrary found that in the³²⁰ relevant year the quantity of the coal lifted by the respondent was much above the fixed quantity. Thus, the award³⁴⁰ passed by the learned arbitrator with respect to claim no.2 was contrary to the evidence on record and therefore³⁶⁰ is rightly set aside by the High Court. Similarly, even with respect to claim no.3 "Escrow Account" is concerned,³⁸⁰ the High Court has rightly interfered with the award passed by the learned arbitrator with respect to claim no.3.⁴⁰⁰

It is required to be noted that the escrow account was required to be opened as per the guidelines issued⁴²⁰ by the Ministry of Coal, Government of India for the preparation of mine closure plant. The guidelines required, inter alia,⁴⁴⁰ the

Handwritten notes in Devanagari script, likely a shorthand or summary of the text, covering the entire length of the printed text.

mining company to open an escrow account with any schedule bank. Accordingly, the respondent opened an escrow account and⁴⁶⁰ executed an escrow agreement. From the correspondence between the parties, it appears that even the appellant consented for opening the⁴⁸⁰ escrow account. The appellant also agreed that the amount to be deposited in the escrow account will be recovered by the⁵⁰⁰ respondent from immediate next payment of the coal bills of the joint venture company PKCL⁵²⁰ raised towards dispatches of coal from appellant's coal blocks. Thus, thereafter it was not open for the appellant to⁵⁴⁰ claim the amount lying in the escrow account. If the amount lying in the escrow account is returned to the⁵⁶⁰ appellant, the purpose and object of opening the escrow account which was as per the guidelines of the Ministry of Coal⁵⁸⁰ would be frustrated. The object and purpose of opening the escrow account was to see that the appellant company⁶⁰⁰ fulfils the contract as per the agreement and till the closure of the coal blocks.

Therefore, the High Court has⁶²⁰ rightly interfered with the award passed by the learned arbitrator with respect to claim no.3 escrow account by observing⁶⁴⁰ that the reasoning is perverse or so irrational that no reasonable person could have arrived at on the material and evidence⁶⁶⁰ on record. We are in complete agreement with the view taken by the learned Division Bench of the High Court.⁶⁸⁰ In view of the above and for the reasons stated above, the present appeal succeeds in part. The impugned judgment⁷⁰⁰ and order passed by the High Court insofar as quashing and setting aside the award passed by the learned sole⁷²⁰ arbitrator, confirmed by the learned Commercial Court, insofar as claim no. 1 price adjustment and escalation is hereby quashed and⁷⁴⁰ set aside and the award passed by the learned arbitrator with respect to claim no.1 is hereby restored.⁷⁶⁰ The impugned judgment and order passed by the High Court insofar as quashing and setting aside the award passed by the⁷⁸⁰ learned arbitrator with respect to rest of the claims, namely, claim no.2 fixed costs and claim no.3 escrow account⁸⁰⁰ is hereby confirmed. The present appeal is partly allowed to the aforesaid extent only. However, in the facts and circumstances⁸²⁰ of the case, there shall be no order as to costs. This is the final Judgment of this court now. ⁸⁴⁰

PLAUSIBLE: reasonable;

QUASHING: decision declared not legal;

INTERALEA: in relation to;

PERVERSE: to get pleasure in an unacceptable way;

RESETORED: to put in former positon.

Handwritten notes in shorthand script, likely representing the text of the judgment and definitions provided on the left. The notes are written in a cursive, shorthand style on lined paper.

Exercise 26 (Legal)

The appellant-assessee is engaged in the business of printing lottery tickets. It would undertake the work of printing on the²⁰ paper that was supplied to it by the parties. The ink and processing material, including the necessary chemicals used⁴⁰ in the process of printing, were procured by the appellant itself. The Trade Tax Officer, Ward 5, Ghaziabad vide orders dated⁶⁰ 28.10.1999 for AY 1996-1997 and AY⁸⁰ 1997-1998 respectively, levied trade tax on the value of ink, processing material and packing material¹⁰⁰ used by the appellant for executing the printing work on the basis of Section 3F of the¹²⁰ U. P. Trade Tax Act, 1948. The appellant, being aggrieved by the aforementioned orders of the Assessing Authority,¹⁴⁰ preferred appeals before the Deputy Commissioner, Trade Tax, Ghaziabad. It was argued by the appellant before the Appellate Authority¹⁶⁰ that the ink, chemicals and other processing materials had not been passed on with the lottery tickets and thus the¹⁸⁰ value of such goods could not have been made liable to tax under Section 3F of the Act, 1948.²⁰⁰ The Appellate Authority vide order accepted the claim of the appellant and accordingly deleted the tax assessed on the²²⁰ value of ink and other processing materials. However, the Appellate Authority upheld the levy of tax on the packing materials.²⁴⁰ The relevant finding of the Appellate Authority are:

Goods on the sale of which tax has been levied on the²⁶⁰ trader which includes processing material, chemicals, film etc. and which is not transferred to the principal after getting work²⁸⁰ contract undertaken done under any circumstances. These material are film, chemical print etc. and these are used for preparing³⁰⁰ plate for screen printing and after the use, either it becomes a waste or its nature gets changed, but it is not³²⁰ transferred to principal who get work contract done under any of the circumstances. It would be pertinent to mention³⁴⁰ the referred portion of the judgment given by Hon'ble Bombay High Court, according to which before levying tax on work contract,³⁶⁰ the necessary test is that transfer of goods either actual or in deemed manner in the contract is essential,³⁸⁰ while in the above-said case, no transfer of above-said goods viz. ink, film developer, chemicals, etc. has taken place.⁴⁰⁰

In the circumstances referred to above, two sets of appeals were filed before the Trade Tax Tribunal, Bench-I, Ghaziabad against⁴²⁰ the order passed by the Appellate Authority. One set of appeals by the Commissioner of Trade Tax, Uttar Pradesh, against the⁴⁴⁰ deletion of tax on the ink and processing material. Another set of appeals by the assessee assailing the

levy¹⁶⁰ of tax on the packing material. The Tribunal vide an order allowed the appellant's appeals and set aside the levy of tax⁴⁸⁰ on the packaging material. Furthermore, the Tribunal dismissed the Revenue's appeals and affirmed the order of the Appellate Authority,⁵⁰⁰ which had deleted the tax on the value of ink and other processing materials, including chemicals. The Tribunal based its⁵²⁰ decision on this Court's decision in Rainbow Colour Lab and the Bombay High Court's decision in Commissioner of Sales Tax, Maharashtra.⁵⁴⁰ The Revenue, being aggrieved by the aforementioned order passed by the Tribunal, challenged it before the High Court vide two⁵⁶⁰ Revision Applications. The High Court, vide the impugned judgment, allowed both the Revision Applications and thereby quashed and set aside the order⁵⁸⁰ of the Tribunal as well as the order passed by the Appellate Authority, so far as they set aside the tax on the⁶⁰⁰ value of ink and processing material, i.e., chemical. The relevant findings of the High Court are as.⁶²⁰

In my view the order of the Tribunal is not sustainable. Section 3-F of the Act levies tax on the⁶⁴⁰ value of goods involved in execution of works contract. The printing work has been held to be works contract by the⁶⁶⁰ Apex Court in the case of State of Maharashtra Versus M/s. Sarvodaya Printing Press Fine Art Printer. The question⁶⁸⁰ for consideration is whether in the printing of lottery tickets, ink and processing materials, namely, chemicals, etc. are passed on⁷⁰⁰ to the customers. Undoubtedly, ink passed on to the customers as it is apparent on the printing paper.⁷²⁰ The inks are diluted in chemicals and such ink in the diluted forms are being used in the printing, therefore,⁷⁴⁰ both ink and chemical are passed on to the customers. It was not the case of the assessee at any stage⁷⁶⁰ that the chemical was consumable and evaporates in the process of printing and is not passed on to the customers.⁷⁸⁰ Therefore, I am of the view that both the ink and chemical used in the printing are passed on to the⁸⁰⁰ customers. It may be mentioned here that the assessee had also purchased and used consumable but the same has not been taxed.⁸²⁰ The Division Bench of the Bombay High Court has held that the contract of dyeing and printing of cloth is a transfer of property.⁸⁴³

PERTINENT: relevant:

ASSAILING: criticizing severely:

AGGRIEVED: upset over unfair treatment:

IMPUGNED: order not applicable:

EVAPORATES: to disappear in air.

Handwritten notes in shorthand script, likely a transcription of the printed text, covering the right half of the page.
